## E-LEARNING

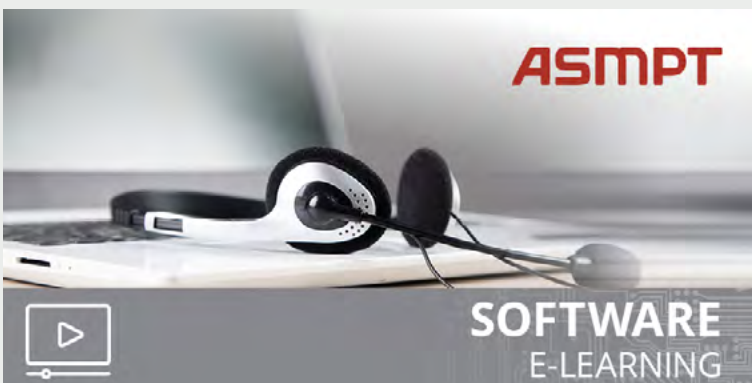

---

Our target group-oriented eLearning courses enable you to continue your education in the best possible way in your work environment.

Program your own printed circuit boards with our interactive software simulation modules and learn how to perform operating and maintenance tasks with the help of instructional videos. Machine functions and components are demonstrated with CAD animations in an easy-to-understand manner. Many of our technical eLearning courses are linked to our Virtual Reality 2D learning modules. Whether your focus is on maintenance, technology or software – our target group-oriented eLearning courses let you update and/or upgrade your professional knowledge easily and effectively. We constantly update these courses and add new ones.

By using CAD graphics and animations, you get an overview of machines, heads and parts. You will be able to learn the main subsystems and also understand the functionalities of subsystems and how to perform part exchange. To deepen the part exchange knowledge with “do it yourself”, most technical trainings have VR 2D Learn included.

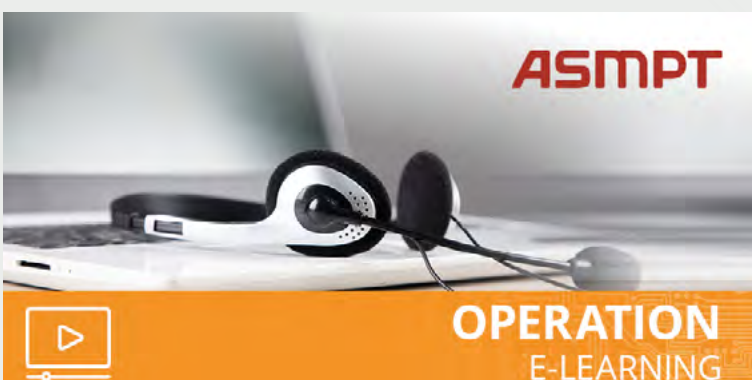

First you get an overview of the theoretical background of the software. Then the learning part begins with guided steps. To deepen what you have learned, “learning by doing” follows with the help of an exercise. Here you will receive a task that you work through realistically and independently in a simulation of the software.

Shows in short lessons and in real time visualisation detailed information about what has to be done, why it has to be done and which tools and consumables are needed. Tasks will be displayed with step by step instructions.

This enables you to apply what you have learned directly on your machine and heads.

In short lessons you will learn step by step the operational working tasks. With the help of a checklist you will be guided to each operational step.

We´ve got different courses for the different tasks from machine start up to shut down of the machine, splicing different tapes and setup of various feeders and stencils.

# VIRTUAL REALITY

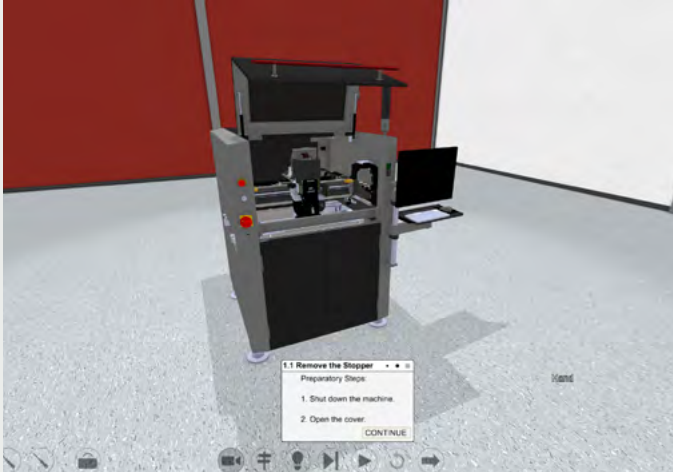

---

With our Virtual Reality 2D and 3D courses we enable you to expand your knowledge in a playful and realistic way.

Do you need to gain practical experience or want to refresh your knowledge? Enter one of our virtual training rooms to practice on our machines, train workflows and carry out assembly and disassembly steps, and do it all as often as you want, anywhere and anytime, with our 2D and 3D Virtual Reality courses.

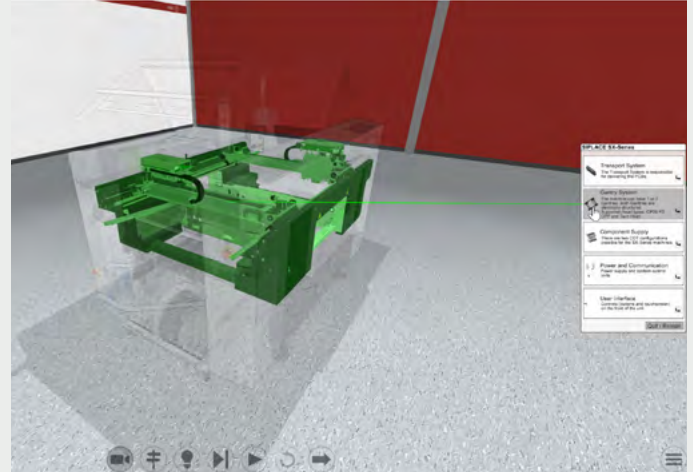

You get the opportunity to obtain knowledge without the fear of damaging the equipment. You can use our virtual training rooms in 2D on your computer via mouse navigation or in 3D on a powerful computer with a controller and compatible VR glasses.

## Virtual Reality **Learn**

Lots of screws and processes? No machine available to practice? No problem, with Virtual Reality Learn you will be guided step by step through work processes in a realistic way. The software tells you the step and you choose the correct tool and conduct the task.

## Virtual Reality **Explore**

You want to take a closer look at a machine? Know where which subsystems are located and see what is normally not visible? With Virtual Reality Explore you have the possibility to select and view certain parts, zoom in, rotate and learn in a playful way.

## Virtual Reality **2D**

We have designed the Virtual Reality courses in such a way that you can select different tools by using your mouse and thus train realistically in 2D on the machine or components on your own computer.

## Virtual Reality **3D**

You have compatible glasses and joystick? Great! We have the tool for it! This gives you the opportunity to put your head in the machine and see everything up close without fear of breaking anything or hurting yourself.

# ARE YOU INTERESTED?

## Free Learning Package

The Learning Package can be found on our [ASMPT homepage](#) with a generic login to our ASMPT Academy and enables us to offer our customers a wide range of free training courses.\* It is important to us that learning, and knowledge is free. For this reason, the focus here is on the Operation, Maintenance, Vision and SIPLACE Pro training courses.

These are the basic knowledge components that are relevant for you - our customers. Furthermore, the courses are not only available in English but also in many other languages. To choose the desired language, the customer simply has to use the filter function in the ASMPT Academy.

BUT our customers not only want free knowledge they want also reporting, which is only available with individual login data, as well as certificates for completed trainings. For this reason, in addition to the free Learning Package, we have provided them with two further packages that they can purchase: **Advanced Learning** and **Unlimited Learning**. These two Learning Packages enable the customer to use different additional functions (their own training admin, certificates, reporting...) depending on the customer's needs.

**HOW TO GET**  
Free Learning

**HOW TO BUY**  
Advanced Learning

**HOW TO BUY**  
Unlimited Learning

\*Virtual Reality is not available in the free area

# CHOOSE YOUR CONTENT

## Advanced Learning Package

Looking for training for a specific machine, head or software? Do you need training for specific target groups such as technicians, operators or programmers? Or do you want to learn with Virtual Reality? With the help of Advanced Learning, you can select the learning content that is relevant for your company.

Buy your Advanced Packages conveniently via our [ASMPT Webshop](#) and receive a code\* for each package, After the employee has entered this code in the ASMPT Academy, he or she can start immediately and receive a certificate after successful completion of the course.

Select one or two training administrators and inform your local training centre. (First and Lastname and the email address). In order to redeem the codes, the training admin and the employees need an ASMPT Academy account. The training admins also need an ASMPT account. This account gives them access to the ASMPT Licence portal where they can view the codes and the status of the codes. The training administrator\*\* assigns the codes to the employees (please note that each employee needs to enter his or her own code in the Academy) and can track the progress of the training via reporting. Furthermore, the administrator can create and manage his or her own people in the Academy.

# ALL OR NOTHING?

## Unlimited Learning Package

All or nothing? Then the Unlimited Learning Package is just right for you! Here you can get our complete\*\*\* eLearning and Virtual Reality offer. Select one or two training administrators\*\* and share them with your Sales Partner at the time of purchase. Also tell him or her which second language you would like to receive in addition to English content. With the Unlimited Learning Package, the administrator is the main focus, as they are responsible not only for user management but also for course management.

They have the possibility to assign courses to employees, group employees by target groups, create learning plans, track the learning process of employees and create various reports.

In short, we make our Academy available to you with all our content and you can plan and organise your training individually according to your needs and make it available to your employees.

\*Each code can only be redeemed once, is valid for 365 days and only for one person. \*\*Courses for Training Admins are available inside the ASMPT Academy. \*\*\*Not every course is available in all languages. Available for 365 days.

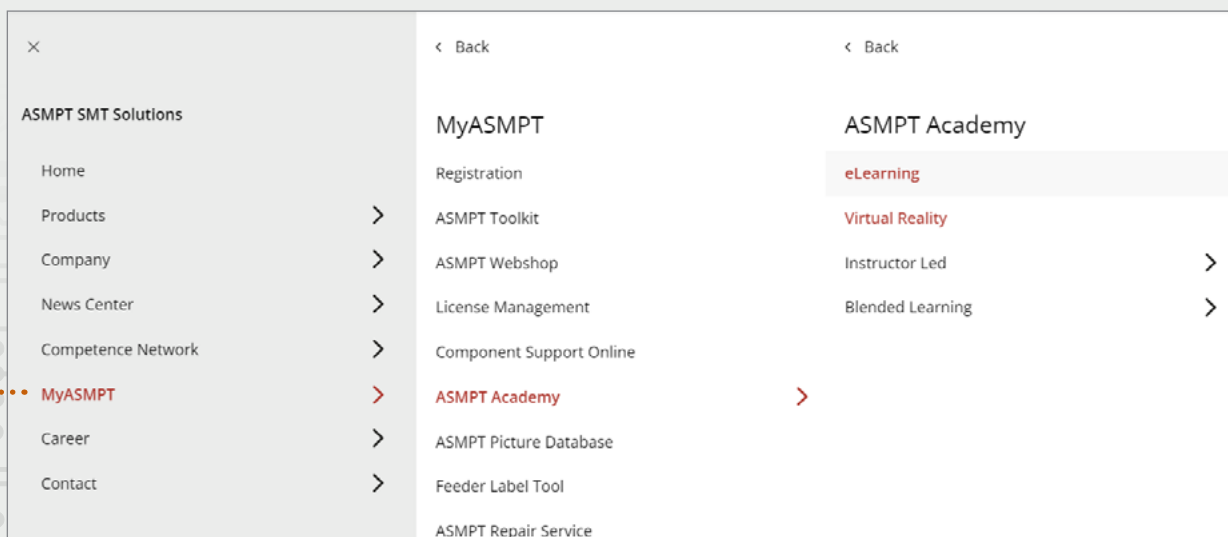

# HOW TO GET FREE LEARNING

The Free Learning Package offers you the opportunity to gain insights into our eLearning offerings. It teaches the basics for operators and maintenance technicians as well as for basic programming.

**Please note the account is a separate general guest account.** (No User History)

## Start the Free Learning Package

- 1 Go to the ASMPT Homepage: <https://smt.asmpt.com>
- 2 Click **menu** > **MyASMPT** > **ASMPT Academy** > **eLearning**
- 3 Scroll down and click on **Learning Package (free)**
- 4 Type your **First** and **Last Name, Company** and your **E-Mail** in the Register Field
- 5 Click **Submit**
- 6 Copy **Username** and **Password**
- 7 Click on [To the Learning Package](#)
- 8 Enter the copied **Username** and **Password**

# HOW TO BUY ADVANCED LEARNING

Are you interested in specific courses? The Advanced Learning Package lets you pick course packages for specific target groups and products. You administer your users, register them for courses, and keep an eye on defined learning targets with the help of reporting features. Also there is a training history of each user and after successfully completion of a course the user gets a certificate.

## Order the Advanced Learning Package courses via the ASMPT Webshop\*

- 1 Go to the ASMPT Homepage: <https://smt.asmpt.com>
- 2 Click **menu** > **ASMPT Webshop** or: <https://smt.asmpt.com/en/myasmpt/webshop>
- 3 Click **To the ASMPT Webshop**
- 4 Login with your user credentials
- 5 Select **ASMPT ACADEMY REQUEST**
- 6 Click **Catalogs** and select **Parts List**
- 7 Select **ASMPT Academy** > **eLearning**
- 8 Select your eLearnings to purchase

\*If you do not have access to the ASMPT webshop, please contact your [sales partner](#).

# ASMPT Webshop

In the ASMPT Webshop you can find detailed information about all ASMPT parts products as well as the technical parts catalogs. With this you can quickly and reliably identify article numbers. Depending on your user settings you can generate immediately quotes, you can order directly in the shop or order referring to this quote. You get overview to your document history, also for all your transactions outside of the Webshop (quotes, orders, deliveries, invoices, credits) and you can track shipments. Repair services can be handled very easy, including generating the repair sticker. Reduce your time and clarification efforts.

Please [request access](#) → to the ASMPT Webshop after registering to the ASMPT User Group.

**ASMPT Webshop Portfolio**  
 The ASMPT Webshop & eCatalog portfolio is about to be updated constantly.

The ASMPT Webshop provides comprehensive information on the following product categories:

- SIPLACE spare parts, wear parts, consumables, adjustment and verification tools
- SIPLACE placement heads, leaders, change over tables
- SIPLACE SOKO nozzles, grippers and magazines
- Repair services for SIPLACE placement heads, leaders and tools
- DEK spare parts, wear parts, MPU, cleaning agents, stencil storage systems
- DEK Stencils

The Webshop is individually adapted to the product range of our customers, so not all product categories may be visible.

# INSTRUCTOR LED TRAINING

Learn from our qualified product experts and improve your skills with hands-on exercises on our machines and virtual software environments.

Learn from our qualified product experts and work together in small groups to share experiences and best practices. Improve your skills with hands-on exercises on our machines or in virtual software environments. The courses can be conducted via videoconference, at one of our Training Centers, or on your company premises.

You can choose from standard course offerings or adapt courses to your specific needs.

## Learning up close and personal

You like to learn in small groups and want to be close to our products to expand your knowledge?

Then our training centers are the right place for you!

Here you will find classroom trainings that are trained by our product experts. They will teach you how to handle and work with our products - face to face.

## ASMPT Training Center

The ASMPT Training Centers can be found in several locations around the world.

Our main locations are in EMEA, Rest of Asia (RoA), AMCAS and China.

In addition to Instructor Led Training, our professional team will be happy to answer any questions you may have about the training.

## You are interested?

Our Customized Instructor Led Trainings are available on demand. Please contact your local [training center](#) for more information.

We look forward to welcoming you!

# BLEND ED LEARNING

---

Blended Learning allows the best of both training worlds to be combined from the eLearning and Instructor Led Training combination.

Our Blended Learning offering is a structured training plan consisting of online courses and instructor-led sessions. Depending on the type of course, the sessions will be held at a Training Center or remotely.

The curriculum starts with predefined eLearning modules. They are followed by an instructor-led session in which the knowledge attained in the eLearning modules is solidified with the help of exercises and questions and answers from the instructor.

Would you like to continue your training conveniently at your workplace? Would you like to learn independently and also be trained in a guided manner and have a contact person? You want a bit of everything? Our Blended Learning offer makes it possible! With our blended learning you get a mix of self-learning with the help of e-learning. And hands-on training in one of our training centres or remotely accompanied by our product expert.

## Software

**PART 1:** Software eLearning and remote session with the trainer. While you are doing the eLearning, the trainer is available to answer your questions.

**PART 2:** You will receive the login to your own virtual software environment. This gives you the opportunity to learn in a realistic way. With the help of explanations and practical exercises, the trainer teaches you how to use the software.

**Benefit:** No traveling needed

## Hardware

**PART 1:** Hardware eLearning and remote session with the trainer. While you are doing the eLearning, the trainer is available to answer your questions.

**PART 2:** You will visit our training centre to deepen the knowledge you have already acquired through "hands-on" practical exercises.

**Benefit:** Before the visit to the training centre, a basic knowledge will already have been acquired, allowing for an immediate start to the practice and shortening the travel time.

# IT'S THE MIX THAT MAKES IT!

## You are interested?

Buy your Blended Learning via our [ASMPT Webshop](#) and receive a code\* then go to our [ASMPT Homepage](#) and select your session date. Your local training center will contact you upon receipt of your Instructor Led Training request date.

*\*Do not use the code before the Blended Learning Training begins.*

**HOW TO BUY**  
Blended Learning

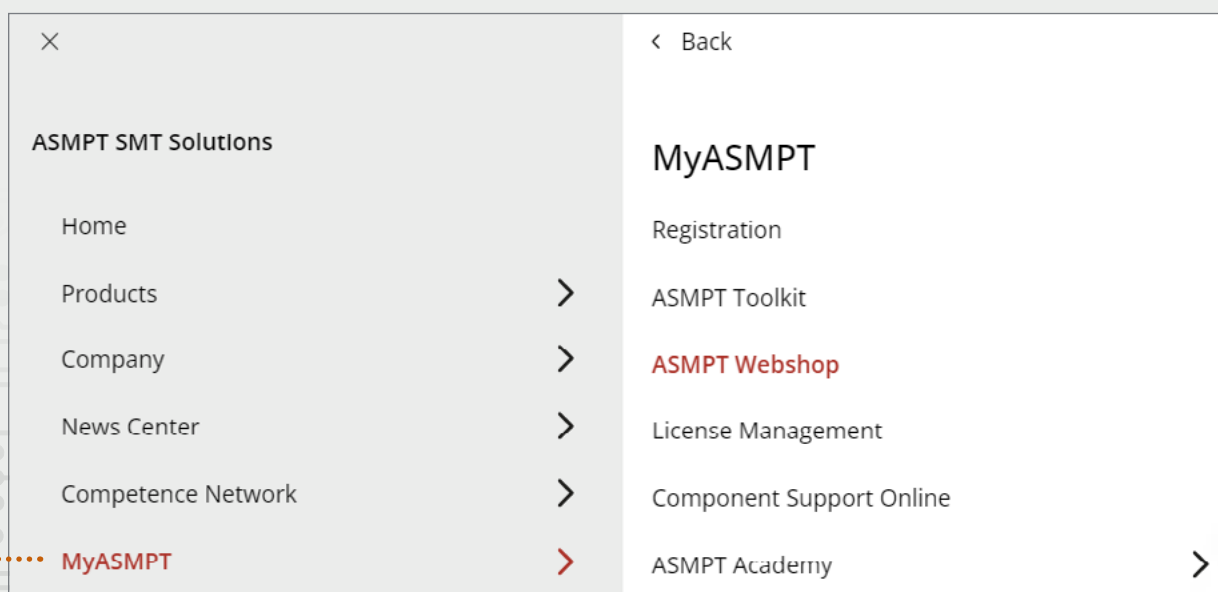

**HOW TO Select**  
Session Dates

# HOW TO BUY BLENDED LEARNING

In the first step you buy your Blended Learning training. With the purchase via the webshop you will receive a code, which you redeem at the ASMPT Academy at the start of the training to activate your learning plan.

## How to order Blended Learning via the ASMPT Webshop\*

- 1 Go to the ASMPT Homepage: <https://smt.asmpt.com>
- 2 Click **menu** > **ASMPT Webshop** or: <https://smt.asmpt.com/en/myasmpt/webshop>
- 3 Click **To the ASMPT Webshop**
- 4 Login with your user credentials
- 5 Select **ASMPT ACADEMY REQUEST**
- 6 Click **Catalogs** and select **Parts List**
- 7 Select **ASMPT Academy** > **Blended Learning**
- 8 Select your Blended Learning to purchase

\*If you do not have access to the ASMPT webshop, please contact your [sales partner](#).

## ASMPT Webshop

In the ASMPT Webshop you can find detailed information about all ASMPT parts products as well as the technical parts catalogs. With this you can quickly and reliably identify article numbers. Depending on your user settings you can generate immediately quotes, you can order directly in the shop or order referring to this quote. You get overview to your document history, also for all your transactions outside of the Webshop (quotes, orders, deliveries, invoices, credits) and you can track shipments. Repair services can be handled very easy, including generating the repair sticker. Reduce your time and clarification efforts.

# HOW TO SELECT BLENDED LEARNING SESSIONS

In the second step you choose one of the available dates where you want to do the Blended Learning Training. Please note this is a request. You will receive the training confirmation afterwards from your local training center.

## Select a Date for the Blended Learning Sessions

- 1 Go to the ASMPT Homepage: <https://smt.asmpt.com>
- 2 Click **menu** > **MyASMPT** > **ASMPT Academy** > **Blended Learning**
- 3 Scroll down and select under Courses offered your **Region**\*
- 4 Click **Course Overview**
- 5 Choose a date and click **Request**
- 6 Fill out the form and click **Send Request**
- 7 Your local training center will inform you about the training confirmation

\*Blended Learning Session Dates are at the moment only available for EMEA.

Course Description:

Das SIPLACE MultiStar (CPP) Blended Learning ist ein Mix aus eLearning und Instructor Led Training (ILT). Der Lernplan startet mit vordefinierten eLearning-Modulen, nach deren Abschluss ein ILT erfolgt. In den ILT Sessions vertiefen Sie das in den eLearning-Modulen erlernte Wissen mit Ihrem Trainer durch Fragen und Antworten, gefolgt von Übungen. Nach Abschluss dieses Blended Learning sind Sie in der Lage, einen CPP-Kopf in der Produktion technisch zu unterstützen, im Fehlerfall die richtigen Maßnahmen zu ergreifen und die Fehlersuche durchzuführen, Teile auszutauschen und alle erforderlichen Einstellungen / Kalibrierungen vorzunehmen. Sie können nachvollziehen, wie das Vakuumsystem und der Bestückprozess funktionieren. Zusätzlich erhalten Sie ein Abschlusszertifikat, das Sie in der ASMPT Academy herunterladen können.
