

Energy Management Policy

ASMPT SMT Singapore Pte. Ltd. is committed to continually improve on our operating efficiency and resource stewardship as we strive to build a sustainable future that will create long-lasting value for our business, stakeholders, community, and the environment.

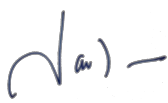

We shall:

1. Improve energy efficiency by implementing effective energy management programs that support manufacturing operations and provide a safe and comfortable working environment.
2. Secure adequate and reliable energy and implement contingency plans to protect manufacturing operations from energy supply disruptions.
3. Continually set and review both objectives and targets so as to improve our energy performance and provide the necessary resources to achieve the objectives and targets.
4. Communicate the energy policy with stakeholders and encourage open reporting and sharing of information.
5. Promote energy conservation of employees through awareness and education.
6. Comply with all relevant international and national legal requirements and other requirements related to energy use, energy consumption and energy efficiency.
7. Continually improve the energy performance and energy management system while supporting manufacturing operations.
8. Support the purchase of energy efficient products and services.
9. Emphasize energy efficiency as a factor for all the production equipment and process design.
