NEWS

10/21/2022
WORKS – Smart Shopfloor Management Suite
With WORKS, electronics manufacturers organise their workflows as simply as effectively and support the operators in their respective areas of activity. Whether it's a complex manufacturing process or a single work task - WORKS has an application ready. The powerful software lays the foundation for the Integrated Smart Factory and promotes step-by-step automation.

Facts on Open Automation #7
With the 100-percent open, license-free IPC-CFX communication standard, Industry 4.0 and the Internet of Things can be implemented quickly and easily. In our show host Laszlo Sereny will discuss with his studio guests why IPC-CFX is truly the only interface you need for digitizing and automating your production and why ASMPT fully supports it.
